International Chiropractic Sports Science Diploma

What is the International Chiropractic Sports Science Diploma Program?

The International Federation of Sports Chiropractic/Fédération Internationale de Chiropratique du Sport (FICS) is proud to provide this unique program of seminars combined with distance learning to you, the dedicated sports chiropractor.

The Education Committee of FICS has endeavoured to put together some of the world's best lecturers on sports chiropractic for this program. Our aim is to set the standard in sports chiropractic education by providing a program that is both theoretical and practical.

This format is designed to accommodate chiropractors who have already obtained a CCSP or DACBSP or equivalent. Furthermore, the program will require you to produce a paper on sports chiropractic, organize a poster presentation, or have experience working outside your office at sporting events and/or with a team.

Why obtain an ICSSD?

We believe this will produce a well-rounded individual chiropractor who is qualified to work at sporting events throughout the world. Furthermore, it is the minimum qualification required to be part of a FICS chiropractic delegation for a national or international event such as the Olympics.

Requirements

Chiropractors (DC/ Cand. manu)

Complete Module 1 (lower extremity hands-on) and Module 2 (upper extremity hands-on). Complete the FICS video program (27 CD-ROMs incl. lectures and notes). Make a case study article or poster presentation or prove practical experience. Pass a written exam. Verification of current CPR or similar credentials in emergency procedures.

Chiropractors with a CCSP

Completion of either Module 1 (lower extremity hands-on) and Module 2 (upper extremity hands-on). Present a case study article, published peer review literature or poster presentation or prove practical experience. Verification of current CPR or similar credentials in emergency procedures. NO video/CD program required.

Chiropractor with DACBSP/CCSS (CAN), MSc, PhD or equivalent

Present a case study article, published peer review literature or poster presentation or proof of practical experience. Verification of current CPR or similar credentials in emergency procedures. NO video/CD program required.

It is not required to obtain an ICSSD or to be interested in sports chiropractic alone to attend any ICSSD Modules as there will be relevant information offered for general chiropractic practice as well.
